TECHNICAL VIRTUAL ASSISTANT | WEB DEVELOPMENT | AI AUTOMATION

PROFESSIONAL SUMMARY

Technical Virtual Assistant and web/automation specialist with experience in administrative support, technical troubleshooting, workflow automation, CRM management, lead generation, and web-related projects. Familiar with Laravel, HTML, CSS, JavaScript, REST APIs, and AI-assisted development using ChatGPT, Claude, and Cursor. Skilled in n8n, Make.com, Zapier, Airtable, GoHighLevel, Figma, Canva, and Google Workspace. Organized, detail-oriented, adaptable, and comfortable learning new tools, solving technical problems, and working independently in remote environments.

WORK EXPERIENCE

Technical Virtual Assistant

- Designed and managed Airtable systems for client onboarding, lead management, project tracking, and business operations using linked records, formulas, lookups, rollups, filtered views, interfaces, and dashboards.
- Built and maintained multi-step automation workflows using n8n, Make.com, and Zapier, leveraging webhooks, HTTP requests, conditional logic, routers, scheduling, and data transformation to reduce manual processes.
- Developed automated client onboarding, CRM, and project management workflows integrating Airtable, Asana, Gmail, Google Drive, and Google Sheets to collect client information, create records, assign tasks, organize documents, and manage follow-ups.
- Created AI-powered content automation workflows that transformed uploaded files into transcriptions, blog posts, Facebook content, and LinkedIn posts using reusable prompts, structured instructions, and automated output processing.
- Developed invoice follow-up automation that monitored overdue accounts, sent reminder emails, escalated long-overdue invoices, and updated tracking records.
- Built AI agents and chatbot workflows for Facebook pages to automate customer inquiries, document retrieval, responses, and conversation tracking using spreadsheets and external integrations.
- Integrated business applications including Xero, Facebook Graph API, Airtable, Asana, Google Workspace, and AI tools to improve workflow efficiency, data accuracy, and information management.
- Troubleshot automation and integration issues by reviewing execution logs, testing workflow steps, validating data, researching API documentation, and resolving technical issues independently.
- Managed client files, email correspondence, lead generation, data entry, task tracking, and administrative documentation with strong attention to detail.

Research & Sourcing Specialist

- Researched and sourced suitable storage facilities and properties based on client requirements, comparing location, availability, pricing, capacity, and service terms while communicating with facility providers to gather relevant information.
- Collected, verified, organized, and maintained accurate information on life sciences researchers and professionals, including academic credentials, affiliations, positions, institutions, and professional contact details.

Lead Generation & Email Marketing Specialist

- Researched and identified potential leads using online platforms and databases.
- Built and maintained accurate prospect lists with verified contact information.
- Conducted targeted email outreach and follow-ups to engage potential clients.

CHILD FORMATION CENTER OF SANTA ROSA

Administrative/IT Staff

- Managed daily administrative and office operations, including data entry, filing, documentation, and record keeping.
- Processed SSS, PhilHealth, and other government contributions and requirements.
- Coordinated events, meetings, and school activities, including logistics and documentation.
- Prepared reports, forms, correspondence, and administrative documents.
- Provided clerical and administrative support to staff, parents, suppliers, and external stakeholders.

FIRST PIONEER DISTRIBUTION INC. - UNILAB

Administrative/IT Staff
